KEM Pumps Ltd

QUALITY POLICY STATEMENT

Our primary objective is to ensure that we provide services that consistently meet and exceed client's requirements and expectations.

At KEM Pumps Ltd we reward our staff for their commitment and provide a stable and enjoyable workplace for the entire team.

We are fully committed to the continual improvement of its performance by the monitoring of quality issues and through involvement with customers, suppliers, regulatory authorities and the community.

To assist with the above KEM Pumps Ltd has implemented a Management System, which gives due consideration to the regulatory requirements of both the Environment and Health and Safety.

The system, including this Policy Statement, is monitored and reviewed for its applicability and effectiveness through internal auditing, management reviews and the analysis of performance against defined objectives.

It is the company policy to ensure that all KEM Pumps Ltd personnel are fully aware of the requirements of the Quality Management System and are appropriately trained and supplied with the resources to ensure its continued effectiveness.

These objectives include the development of a more comprehensive dialogue with our suppliers and customers, for mutual benefit. This dialogue is expanded and communicated within the company to ensure a full understanding of our objectives and performance and the opportunity for input at all levels and form a basis of our continuous improvement policy.
